What is Direct-Pay?

Direct-Pay is a convenient way to pay your water bill. Each month, the total amount due is automatically transferred from your bank account.

How is Direct-Pay different from the current online payment option?

When you enroll in Direct-Pay, you avoid the fees that are attached to our current online method through HeyGov.

How is Direct-Pay different from bill payment services provided by my bank?

When you pay your water bill using the bill payment services provided by your bank, your bank sends us a payment (check) on your behalf. The payment may arrive after the due date, resulting in a late payment. Direct-Pay automatically transfers the total amount due each month before the due date, eliminating late payments.

Enrollment is easy:

- 1 Complete the Direct-Pay Enrollment Form (below).
- 2 Enrollment begins with the next water bill, please continue to pay your water bill until you see "automatic payment" on your water bill.
- 3 The Total Amount Due on your water bill will be automatically transferred from your bank account on the last Thursday of each month.
