

Deephaven Digest

2nd Quarter, 2026 | Issue 83

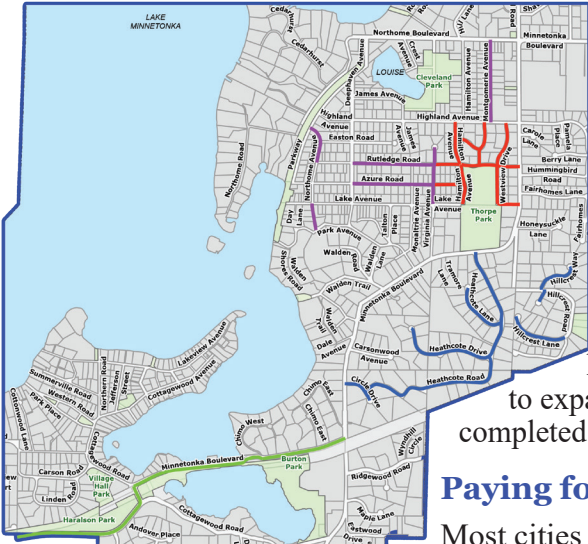

Welcome to Spring: The Season of Construction in Deephaven

The construction projects planned for this spring and summer have been topics discussed at length in prior newsletters. Here, again, we see this project take centerstage as a front-page article in the Spring Issue of the Deephaven Digest. Why so much press? We believe the difference between a successful project and a difficult / stressful / frustrating project will come down to communication with our residents. So, we thought it would be beneficial to lead this issue off with an update on the approvals, scope of projects and what we can expect for this spring, summer and beyond.

In This Issue:

2026 Parking Sticker:	Page 2
City Clean-up Day:	Page 3
2026 Other Projects:	Page 5
P&Z Year in Review:	Page 6
2026 LBAE Meeting:	Page 7

The Deephaven City Council considered four separate project areas for the 2026 Street Project. After receiving and reviewing the seven bids received for the base three-mile project and two alternate projects, City Staff and Council were both surprised and impressed by the low bids that came in substantially below the initial project estimate of roughly \$5.5 million. At the March 2, 2026 Council meeting, the Council acknowledged the City's continued focus and commitment to addressing the roads that are in poor or failing condition and noted that over two additional miles of roadway, in addition to the three-mile base project, were available for improvement based upon the optimal low bids received. After discussion and review, the Council voted unanimously to expand the project to include all alternate bids for a five-mile project to be completed this year with a final project cost of approximately \$4.25 million.

Paying for Street Projects

Larger maps and additional information can be found on the Project Website: <https://bit.ly/2026StreetProject>

Most cities in Minnesota use special assessments to help offset the cost of street projects. Special assessments require owners of properties that benefit from a particular project or improvement to pay "out of pocket" for a portion of that improvement. The City of Deephaven is fortunate to have other means to cover the expenses of our infrastructure projects and does not specially assess properties as a source of funding.

To fund this year's street project, the City will be issuing a 2026A Series Tax Abatement Bond in the amount of \$4,255,000, payable over ten years at an interest rate average of 3.48%. The City has been working on a cadence that would allow for three-mile projects every three years at an anticipated cost of \$3,000,000 per project. Over the past few years, the City has used the Capital Improvement Levy to accumulate enough funding to bond for a project without requiring significant increases in the property tax levy to fund that expense. Based upon the structure of our street project funding plan, the City will still be able to absorb the larger approved project without a notable impact on the property tax levy. The expanded project, however, will likely delay the second phase of street improvement projects by a year or two to allow additional time to fund the next steps in this process.

Project Timing and Cadence

The current street project plan divides the street improvements into four distinct areas. Each area is anticipated to take approximately six weeks to complete and is slated to begin in late May or early June. All construction is expected to be completed sometime this fall.

2026 Street Project Continued on Page 4

Parking Sticker Season is Here!

Lakes and Parks Season is right around the corner! Our new-look Deephaven parking stickers, celebrating the Semiquincentennial Anniversary of our Country, are in and have been mailed out to residents. Please remember to affix these stickers to your rear driver's side window, in the lower corner in a way that is easily visible for Staff and our Police Department. Additional parking stickers are available at City Hall: \$10 each for residents; non-resident stickers are \$60 for beach parking only, or \$120 for beach and boat launch parking this summer. Finally, please observe parking restrictions and help us deter mischief by locking your car doors and not leaving any valuables visible in your vehicles. Thank you, and we hope you have a great spring and summer at our fantastic parks and beaches!

Boating Season is Nearly Here!

TOP 5 DNR BOATING SAFETY TIPS

- Wear your life jacket and make sure children wear theirs.
- Stay sober. Booze and boating don't mix. Alcohol is the #1 factor in boating fatalities.
- Tell a friend. Tell someone where you are headed and when you will be back. If you are not back, they should call 911.
- Be weather aware. Don't let a storm surprise you; delay your trip or head to shore. Go slow in rough water, avoid capsizing.
- Boat smart. Take a boating safety course. Know your boat; stay alert while scanning for dangers; stay seated and low in the boat to prevent falls overboard.

Join the Deephaven Beach Patrol

Starting Rates

Beach lifeguard have a starting rate of \$22 per hour, Beach Leads will start at \$24 per hour

Pay negotiable based on experience and knowledge

Requirements

- Up-to-date lifeguard certification with Waterfront Skills or willing to take class by end of May
 - Contact us to schedule
- Attend mandatory trainings (2x a month)
 - Days/Times TBD once staff is hired
- Willing to work weekends and holidays; 4th of July and Labor Day
- Able to get to and from Beaches on your own

Why our Team

The mission of the Deephaven Beach Patrol is to provide professional lifeguarding service to all residents and guests of the Deephaven beaches with the highest standards of safety, integrity and excellence in the preparation and performance of lifeguarding skills

✉ kryck.makayla@gmail.com

For more information on these opportunities, or to learn more about other volunteer offerings, please visit the City's website:

www.cityofdeephaven.org, or contact City Clerk, Kimberly

Stormwater Management: Protecting the Water in Minnesota's 10,000 Lakes

Stormwater is the water that runs off buildings, streets, sidewalks, and parking lots – anywhere it is unable to soak into the ground after rain and snowmelt. Storm sewer inlets are connected and discharge into nearby waterways, instead of to the sanitary sewer, which discharges to a wastewater treatment plant. If not well-managed, stormwater can contaminate aquatic habitats and kill plants, fish, and animals in our local bodies of water. Managing stormwater is critical to environmental and community health. Here's how you can help:

- Keep litter and debris, including grass clippings, away from storm drains and do not pour household chemicals on the ground or into the storm drains.
- Replant bare lawn spots to prevent soil erosion.
- Pick up pet waste and dispose of it properly.
- Don't overwater or overfertilize your lawn.
- Use a rain barrel; plant a rain garden or native plants.

Another aspect of managing our stormwater is preventing illicit discharges, which are unlawful acts of disposing, dumping, spilling, emitting, or other discharge of any substance other than stormwater into our stormwater drainage system, or directly into streams or lakes. As a community member, you play a key role in identifying and reducing illicit discharges in our City.

Think Spring.

Seasonal Public Works Employment Opportunity

The City of Deephaven is looking for enthusiastic individuals who are interested in working in the great outdoors for our Public Works Department this summer. The salary is \$20.00-\$21.00 per hour for 30-40 hours per week.

Contact the Public Works Supervisor, Jeff Kask: j.kask@cityofdeephaven.org

Plan Ahead: The Right Plants Make All the Difference!

With spring around the corner, now is the time to prepare. Many of us are actively encouraging more butterflies, and native species are the way to success. To attract monarchs, focus on native nectar plants and milkweed to support their full lifecycle. Here are the best monarch-friendly plants that thrive in Minnesota (zones 3–4):

Milkweeds (Vital Larva Host Plants)

The only plants adult monarch butterflies lay their eggs on—as milkweeds are the only plants their hatched caterpillars eat. Try Common Milkweed (*Asclepias syriaca*). Tall, robust, and very attractive to monarchs, it spreads easily and is great for wild or meadow-style gardens. Or try Swamp Milkweed (*Asclepias incarnata*). Preferring moist soil, it's good near rain gardens or ponds and is more compact and garden-friendly than Common Milkweed. Finally, Butterfly Weed (*Asclepias tuberosa*) with bright orange flowers. It loves dry, sandy soil and doesn't spread aggressively. Great for flower beds.

Nectar Plants (Fuel for Adult Monarchs / Pollinators)

Spring/Summer Bloomers: Purple Coneflower (*Echinacea purpurea*), Black-eyed Susan (*Rudbeckia hirta*), Wild Bergamot (*Monarda fistulosa*), Liatris (Blazing Star), Coreopsis (lanceleaf), Penstemon.

Late Summer/Fall Bloomers (critical for southbound migration)

New England Aster (*Symphyotrichum novae-angliae*), Goldenrod (*Solidago* spp.) and Joe-Pye Weed (*Eutrochium purpureum*).

Tips for Success

- Avoid pesticides and plants with neonicotinoids (neonics)
- Cluster flowers—monarchs prefer mass plantings to isolated plants
- Stagger bloom times for nectar sources from late spring to early fall
- Let some milkweed go to seed to expand your patch
- Plant milkweed in several spots for egg-laying
- Position tall plants (e.g., Joe-Pye, some aster) at the back (or north side) to avoid shading smaller ones
- Leave open soil patches for caterpillars to pupate and complete their lifecycle

Curbside Yard, Shrub & Tree Waste Pickup

DATE: Saturday, May 16, 2026 **TIME:** Beginning at 7:00 a.m.

WHAT: Yard, shrub and tree waste will be collected curbside.

- Brush should be cut in 4' lengths, 4" or less in diameter.
- Please **BUNDLE** the brush so that one person can handle it.
- Use only compostable and/or paper bags for grass/leaves.
- Please limit all bags and bundles to 40 lbs. or less.
- **YARD, SHRUB & TREE WASTE ONLY!**

Drop-Off Site For Disposable Items

DATE: Saturday, May 16, 2026 **TIME:** 8:00 a.m. to 1:00 p.m.

WHERE: Deephaven City Hall

WHAT: Deephaven residents may discard a variety of items

ITEMS NOT ACCEPTED: concrete, dirt, liquids, tree stumps, appliances, batteries, 55-gallon drums, electronics, hazardous waste (including paint cans) or construction debris.

ACCEPTED ITEMS:

- Bicycles or scrap metal - **Free**
- Mattress, box spring, couch, recliner, carpet (rolls 6' or less, 12" diameter or less, tied with twine, no wire): \$20.00 each
- Tires (no rims): car, boat, motorcycle: \$5.00 each
- Tires (no rims), Truck: \$15.00 each
- Tires (no rims), Tractor: \$20.00 each
- Lawnmowers & snowblowers (drain gas & oil): \$15.00 each
- Car load: \$20.00 each
- SUVs, mini-vans & trailer load: \$25.00 each
- Pickups & vans: half load \$25.00 each, full load \$45.00 each
- **No U-Haul or rental trucks allowed**
- **Please make checks payable to the City of Deephaven**
- **Staff has final say on charges & materials to be accepted**

Major Appliance & Electronics Pickup

DATE: Thursday, May 21, 2026

Time: 7:00 a.m.

WHAT: Household appliances & electronics will be collected curbside by JR's Advanced Recyclers.

If you wish to dispose of an appliance or electronic item, please call JR's at 651-454-9215 NO LATER THAN THURS. May 14th to arrange for pickup on May 21, 2026. JR's will place your order & arrange for the method of payment: check, cash or credit card. Once you have arranged the pickup with JR's, **please place your appliance(s) or electronic equipment at the curb NO LATER THAN 7:00 a.m. THURSDAY, MAY 21st, 2026.**

- **COST:** There will be a charge of **\$40.00 per unit for the first appliance, \$10.00 each additional appliance.** Please call JR's for individual pricing to dispose of electronics.
- **APPLIANCES INCLUDED:** Air conditioners, dehumidifiers, dishwashers, dryers, freezers, furnaces, garbage disposals, humidifiers, microwaves, refrigerators, stoves/ovens, trash compactors, washing machines, water heaters and softeners. JR's reserves the right to refuse any appliances that contain food, debris, or foreign material, or are in a compacted/destroyed condition that prevents the removal of hazardous wastes and/or refrigerants by law.
- **ELECTRONICS INCLUDED:** CD players, cell phones, copiers, computers, laptops, fax machines, modems, monitors, printers, TVs, treadmills, typewriters, vacuum cleaners, VCR/ DVD players.

.... 2026 Street Project Continued

The first phase of construction is currently planned to begin in the Thorpe Park neighborhood, depicted on the project map in red on the cover of this Newsletter. The second phase will begin to the west, in the area depicted in purple. The project will then shift to the Heathcote neighborhood, noted in blue, with the last phase of the project being constructed on Minnetonka Boulevard as depicted in green. Each area will require approximately six weeks of construction, with each area being completed before the next project area is started. This should help to mitigate construction disruption by keeping it contained only to the area currently under construction.

As mentioned earlier, communication regarding the construction process and the impact it will have on our community is of primary importance. The current communication plan involves a multi-faceted approach to engage as many residents as possible to keep our community informed and up to date on the progression of this project. The City will continue to cover this project and provide updates in our quarterly newsletters and will continue to send letters directly to property owners that reside along the streets being improved. Additionally, a project website has been created to provide current project updates and notes: <https://bit.ly/2026StreetProject>. This website will be updated frequently to provide the most up to date information available. Accessing this website can be done by the url provided here, or by scanning the QR Code included in this Newsletter, or as displayed on other publications and notice materials. The QR Code can also be found on road signs that will be placed along the road construction route, which will include a visual of the current phase and localized status of the project. Our hope is that this visual cue will help keep our community informed on the current status of each street involved in the project.

As a final measure for communication, the website displayed above has a “Stay Informed” section where residents can sign up for weekly email updates regarding the status and progress of this project. Residents that elect to sign up will receive email updates that provide more context and explanation into each phase of the project, project impacts and current timing. Residents with questions or concerns regarding this project can reach out directly to our project engineer: Adam Noreen, Construction Manager: (612) 214-5016. His contact information is provided in the letters and on the project website as well.

Sample of signage to be installed along project route

Other Projects, Complications and Confusion

As the article title aptly suggests, this will be the “Season of Construction” in Deephaven. In addition to the 2026 Street Project, Xcel Energy, Midco Fiber Internet and CenterPoint Energy all have construction projects taking place in Deephaven this summer as well. This map shows the location of these projects which will, at times and to some extent, overlap with the 2026 Street Project.

The Midco Communication project is bringing fiber internet service and access this summer to all of our properties here in Deephaven. This project is depicted in tan on the Private Utility Project map. This service, long overdue for our community, involves directional boring fiber internet lines in the rights of way. Typically, this process will not impact traffic or roadways, but it can sometimes create temporary traffic delays and result in disturbed roadside areas or rights of way. This is not a City project, and we have no control over the method or process that will be employed by Midco Communications. For questions related to their project, you can contact Midco project manager Andy Wirth: andy.wirth@midco.com; (888) 425-1475.

The CenterPoint Energy project is the second phase of the project that started last spring. CenterPoint Energy replaced the services from the gas main to residential properties. This year, CenterPoint is replacing the natural gas mains in the areas depicted in green on the private utility project map. This project will create some disruption in traffic and driving lanes and will result in grass areas and rights of way being disturbed. Much like the Xcel and Midco projects, the City cannot control or direct the efforts of CenterPoint Energy.

Larger maps and additional information can be found on the Project Website: <https://bit.ly/2026StreetProject>

.... 2026 Street Project Continued

For questions related to this project, you can contact CenterPoint Energy project public relations manager Hailey Torborg: hailey.torborg@centerpointenergy.com; (612) 321-4510.

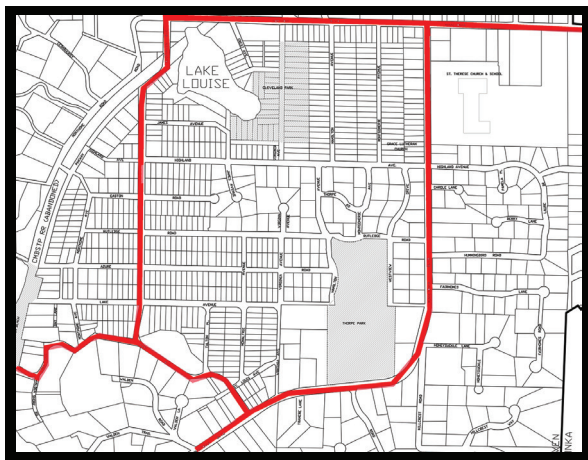

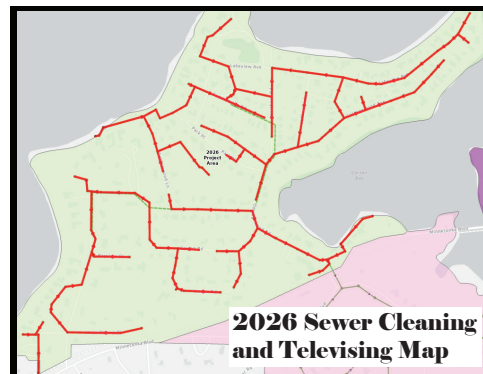

The Xcel Energy project will replace telephone poles and provide higher, more secure power to our community and the general area. This project is depicted in maroon on the project map. The installation of the poles will likely not occur until 2027, but the cutting of trees, brush and vegetation in the Xcel Energy easement areas will be conducted this spring, summer and fall. The City of Deephaven has no control over this project and does not have authority to direct the efforts of Xcel regarding their process. For questions related to this project, you can contact Kati Chapman: Kati.Chapman@xcelenergy.com, (651) 983-5934.

The City of Deephaven, Staff and Council, are excited to be moving forward with the road repair and replacement program we have been working toward for the past few years. We know that road construction causes noise, disruption and frustration; we ask for your patience and grace this summer as we work through these improvements. Once completed, roughly half of the roads that are currently rated in poor or worse condition will have been repaired or replaced. We look forward to moving into the “Season of Construction” with motivation to provide the smoothest construction projects possible for our community and hope for a quick and timely conclusion to this process.

Thank you, in advance, for your patience, grace, understanding and support.

Spring Sewer Main Televising Project

Cleaning and televising the City’s sewer system is a routine municipal maintenance program that uses high-pressure water (jetting) and robotic cameras (CCTV) to video-scope, inspect, and clean the City’s public sewer system. This program helps prevent sewer backups by clearing debris and root intrusions and provides a conditions assessment to plan any maintenance and repair projects that may be necessary. The Deephaven Public Works Department cleans and televises one-fifth of the City’s sanitary sewer mains each year. This process includes recording footage and documenting conditions in the sewer mains to provide a clear picture of any inflow, pipe defects, root obstructions, or failing sections that need to be repaired or monitored for future repairs. This process does not typically impact residents outside of potential traffic delays while the crews access the sewer system through manholes located in the roadway. This year’s project will take place in the Cottagewood neighborhood of Deephaven as depicted on the map to the right. For questions regarding the sewer cleaning process, please contact Public Works Supervisor, Jeff Kask: j.kask@cityofdeephaven.org.

This project, as depicted, is located around Thorpe Park and Lake Louise

Annual Street Maintenance Projects

Much like the sanitary sewer jetting project above, City Staff conduct annual crack filling repairs and schedule sealcoat and fog seal maintenance on City streets around our community. While crack filling and, of course, pothole repair is a city-wide project each year, the sealcoat and fog seal project typically covers around one-sixth of the City’s roads each summer.

The City’s street repair process begins with Public Works Staff filling the cracks in the bituminous pavement on all of the streets scheduled to be fog sealed. The contractor then coats the road surface with a layer of asphalt emulsion oil, followed by the application of granite trap rock. After traffic has effectively compacted the trap rock into the oil, a final sweep of the excess rock is done to remove the remaining loose rock. The final step in

the process is an application of asphalt fog seal that helps lock in the rock to extend the usefulness and condition of the roadway. The fog seal works as a binder to prevent the trap rock from coming loose and serves to protect the road surface for several years after application. This year the annual chip / fog seal project will be conducted on Minnetonka Boulevard, from Walden Trail to the City of Minnetonka boundary line; Northome Road, Deephaven Avenue, Park Avenue, Hillside Street, and Maple Chase Drive. For questions regarding the street repair or chip/fog seal process, please contact Public Works Supervisor, Jeff Kask: j.kask@cityofdeephaven.org.

Keeping an eye out for Alvin the Gnome

Our favorite tiny traveler, Alvin the Gnome, checked in with us back in February, living his best life in a palm tree somewhere warm. Honestly... we can't say we blame him during the winter months. Since then? Nothing. Not a peep. Not a single gnome sighting. With the way Minnesota weather has been behaving... spring one day, winter the next, and then back again... it seems Alvin may have decided to stay somewhere a little more predictable (and a lot warmer). But if we know him, he won't stay away forever. The charming little City of Deephaven is hard to resist, after all. Alvin has a way of popping back into town when we least expect it... usually right when we think winter is finally over (so... we'll say sometime between now and July). Until then, if you're out and about, you might want to take a peek at Alvin's tree... just in case he decides to sneak back home when no one's looking.

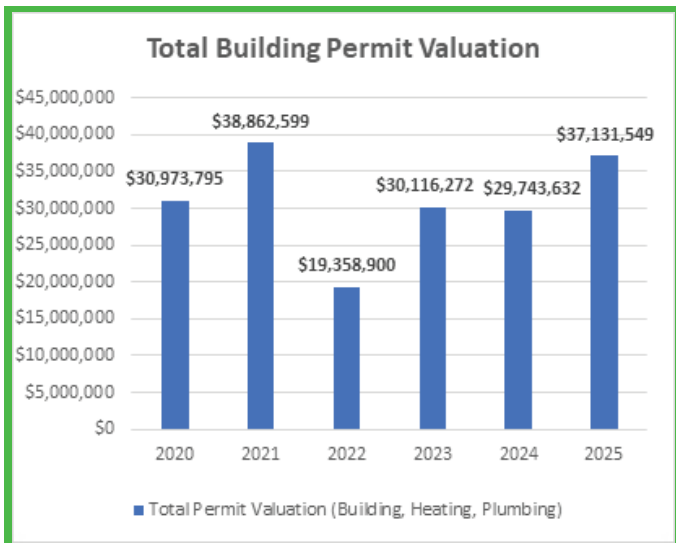

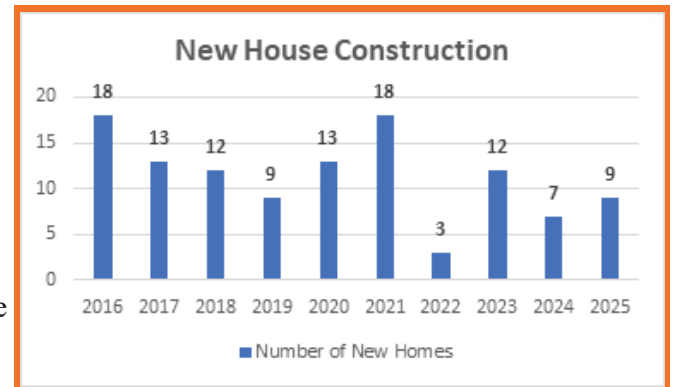

Deephaven 2025 Construction and Development Highlights

Each year the Planning Commission looks back at the construction activity and planning activity in Deephaven. In 2025, Deephaven experienced average residential construction in terms of number of houses, value of construction and number of building permits. Highlights include:

Nine new homes were constructed in 2025, which is slightly lower than the previous nine-year average of 11.7 new homes per year.

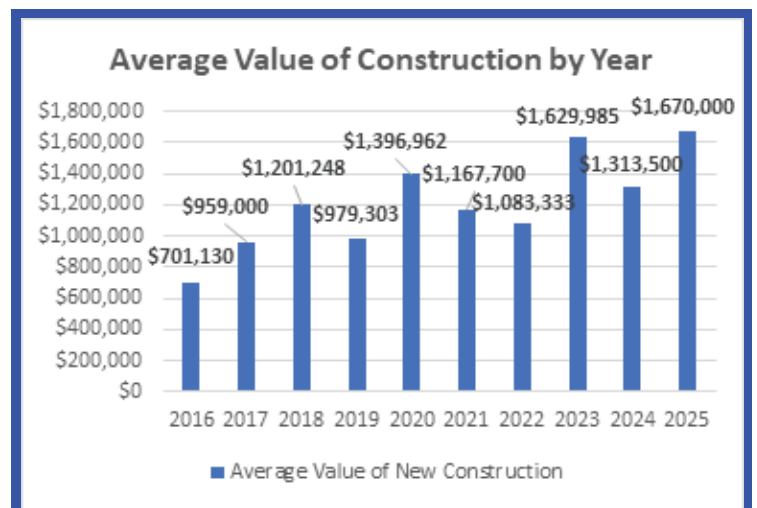

The average market value of the nine new homes is \$1,670,500, which is higher than the average value of \$1,159,129 over the previous nine years.

Of these nine newly constructed homes, only one needed a variance. Of the 13 house additions constructed last year, only three needed variances and three required Conditional Use Permits.

The City issued 761 total permits in 2025 (building, mechanical and plumbing), which exceeded the nine-year average of 471 total permits.

The total value of all building permits received in 2025 was \$39,131,549. This represents the amount of money invested in the City and the expansion of the City's Market Valuation, which is higher than the nine-year average.

For additional information on Building Permit Reports, or for other information related to the Planning and Zoning activities in the City of Deephaven, please visit the City's website at: <https://cityofdeephaven.org/city-planning-zoning/>. For questions regarding these reports or other matters related to planning and zoning activities, please contact City Planner, Pat Smith: pat@cityofdeephaven.org; (952) 474-4755.

Local Board of Appeal and Equalization
6:00 p.m., Monday, April 20, 2026
Council Chambers, Deephaven City Hall

Members of the Deephaven City Council act as the Deephaven Local Board of Appeal and Equalization. The Board hears appeals from property owners who disagree with the County Assessor’s market valuation of their property. The purpose of the Board of Appeal and Equalization is to provide a fair and objective forum for property owners to appeal their valuation or classification. This process often serves as the first formal step in the appeals process for taxpayers. Typically, property owners who seek to challenge the assessment of their properties must first contact the County Assessor directly to begin that process prior to the Board of Equalization and Appeal meeting. Any changes to property valuations made by the Board must be substantiated by facts. Any value reductions must be justified because they have the effect of shifting the tax burden to other properties in the jurisdiction. Further, any changes made by the Board must meet statutory guidelines, including those provided in Minnesota Statute §274.014.

Michael Smerdon, SAMA
Principal Residential Appraiser
Hennepin County Assessor's Office
Michael.Smerdon@hennepin.us
Office: (612) 596-1362
Cell: (612) 267-4480

If you believe the estimated market valuation of your property is incorrect, please contact Michael Smerdon, Hennepin County Property Appraiser, to discuss your thoughts and concerns. If you disagree with the valuation or classification after discussing it with Mr. Smerdon, you may appear before the Local Board of Appeal and Equalization. The Board will review the estimated market valuation of your property and may make corrections if warranted. Generally, a property owner must appeal to the Local Board before appealing to the County Board of Appeal and Equalization. Additionally, a property owner can appeal decisions made by the Local Board of Appeal and Equalization to the County Board of Appeal and Equalization as well. This year, the Local Board of Appeal and Equalization Meeting will be held on Monday, April 20, 2026 at 6:00 p.m. at Deephaven City Hall: 20225 Cottagewood Road, Deephaven, Minnesota 55331.

Deephaven City Meeting Calendar

The City of Deephaven observes Summer Office Hours beginning May 27, and ending September 7, 2026. City Hall will be open Monday through Thursday, from 8 a.m. until 4:30 p.m., and on Fridays from 8 a.m. to 12:00 noon. The Local Board of Appeal and Equalization (LBAE) Public Hearing will be held on Monday, April 20th at 6:00 p.m. The Deephaven City Council meets at 7:00 p.m. on the first and third Mondays of each month: April 6th and 20th, May 4th and 18th; and June 1st and 15th this year. The Park Board meets on the 1st Tuesday of each month: April 7th; May 5th, and June 2nd. The Planning Commission meets on the 3rd Tuesday of each month: April 21st; May 19th; and June 16th.

Mayor Carlson's Mentions

Springtime is a time for new beginnings

Springtime in Deephaven is the time of beginnings. The beginning of warm weather, the beginning of grilling season, the beginning of another year of reconnecting with neighbors and enjoying all of the outdoor activities our community has to offer.

Springtime is also the beginning of the legislative session in Minnesota. While not necessarily as fun or engaging as neighborhood barbecues, it is at least equally as important. I want to take a moment to update our community on a bill that would have impacted every city in Minnesota. The bill would have required cities to allow multifamily development in all zoning districts in all cities with a population greater than 2500. The coalition behind this bill claimed that this would have solved the affordable housing crisis. I believe that the affordable housing shortage has many contributing factors, including material cost, labor shortages, tariffs on imported goods. Local zoning is not a significant contributor to the total cost of housing. Fortunately for us, this legislation appears to be

on the back burner. With that said, our State representatives Patty Acomb (rep.patty.acomb@house.mn.gov) and Senator Johnson Stewart (sen.ann.johnson.stewart@mnsenate.gov) have been strong supporters of our cities efforts to retain jurisdiction over local zoning. Please reach out and thank them.

I would also like to thank the Minnetonka Yacht Club for partnering with the City on this year's 4th of July Semiquincentennial fireworks display. We all look forward to celebrating the 250th Anniversary of our Country and the start of another great tradition for Deephaven.

Thank you for your continued support of our great community! I wish you all the best this spring season and look forward to seeing you out and about in the coming months.

Sincerely,

- Mayor Kent Carlson
