

**\* You are Invited to Attend an Informational Meeting with the Board of Supervisors \***

Haven has a MPCA site 262120 that has been investigated and determined to have concentrations of Perfluorooctane Sulfonate (PFOS) & Perfluorooctanoic Acid (POFA) that were detected in the groundwater.

**Site Location:** 4958 County Road 8 SE, St. Cloud, MN 56304

The following agency's Minnesota Pollution Control Agency & Minnesota Department of Health will present the report findings of the Monitoring Wells that have been permitted in the township.

**We need residents to help with testing by granting access to private wells to aid in this investigation.**

Please visit the website **haventwp.org** for more information on this.

(Middle of Page-Choose the tab Minnesota Pollution Control Agency Reports Haven Township)

**Testing Results to Date at Permanent Monitoring Wells**

Various concentrations of Per-and Polyfluoroalkyl Substances (PFAS) "Forever Chemicals" were detected in the monitoring wells sampled during the July & October 2024 sampling events. The following PFAS compounds were detected at a concentration that exceeds an established regulatory criterion: Perfluorooctanoic Acid (PFOA) was detected in each of the 4 monitoring wells at concentrations exceeding the regulatory criteria of 0.0079 ng/L.

**Results**

**Detected Concentrations at Site Wells**

**MW-1** 9.9 and 8.6 ng/L; respectively

**MW-2** 16.7 and 13.0 ng/L; respectively

**MW-3** 6.6 and 6.2 ng/L; respectively

**MW-4** 20.5 and 17.7 ng/L; respectively

**Meeting Date & Time**

**Date: Tuesday, February 17, 2026**

**Time: 2:00 p.m.**

**Location: Haven Township Hall**

**Check Website: [haventwp.org](http://haventwp.org)**
