

# THE FACTS ABOUT RISING PRESCRIPTION DRUG COSTS

## THE ISSUE

- Drug prices will rise 12% in 2017, 10% in 2016 and 13% in 2015... **FASTER** than wages — CBS NEWS
- 373% increase in the 50 most popular generic drug pricing in the last 4 years — OptumRx
- Today, prescription drug expenditures are nearly 20% of health care costs — Medicare Drug Spending
- 20% of Americans report they have skipped or cut drugs in ½ due to rising costs — Money Magazine
- 55% of Adults over 50 decided not to refill a prescription due to cost — AARP
- 81% of workers have 4 or more formulary tiers in their prescription drug benefits plan — Money Magazine

**HIGHER DRUG PRICES = Patients Struggling with High Copays Resulting in Lower Compliance**

## THE SOLUTION TO RISING DRUG COSTS

### Custom Compounding Alternatives:

- Improve Outcomes
- Reduce Out of Pocket Expense

### UNWANTED SIDE EFFECTS WITH CURRENT Rx?

Compounded Alternatives allow for formulation adjustments to meet the CUSTOMIZED needs of each patient. Often a change in: fillers, method of delivery or even just a slight tweak in dosing can alleviate the unwanted side effect while improving clinical outcomes.

### HOW TO EXPLORE IF COMPOUNDED ALTERNATIVES CAN SAVE YOU SOME \$\$\$:

Request a Compounding Consultation where you meet with one of our Compounding Pharmacists who will crunch the numbers to determine if we can creatively reduce your out of pocket Expense...while IMPROVING Clinical Outcomes!

### OUR GOAL:
