

Sheboygan County

Rural Addressing Process

Planning & Conservation Department

Driveway Location

A driveway location is needed to properly assign an address. New driveways will need a permit from your Town, the County, or the State DOT.

Supporting Information

Supporting documentation is not required, but is helpful. This can be a site plan, survey, or driveway permit.

Address Application

Fill out the address application (by hand or on a computer) as complete as possible. Indicate the driveway location on the application. The more details the better.

Submission

Submit the application, along with your payment, to the Planning Department. An address will be assigned within 10 working days of payment receipt.

Sign Delivery

Once the County receives your sign (and post), you will be contacted for pickup. This can take up to several weeks. All installation hardware is included.
