

**Question 1:** Please articulate the strengths (benefits or opportunities) from generating income from wharf users (business, day trippers, fishermen or residents) that would contribute to wharf maintenance, upgrades and a long term wharf resiliency fund.

**Question 2:** Please describe the challenges that might come from implementing a wharf fee on wharf users (businesses, day trippers, fishermen or residents)?

**Question 3:** If you are a ferry or another business owner who utilizes the public wharf for your business please describe the personal or administrative hurdles / challenges that might exist within the implementation of this fee.

We understand that this is not an easy thing administratively and want to be thoughtful with this design.

**Question 4:** With the understanding that the Plantation endeavors to upgrade the public wharf such that it will be resilient, safe and functional for generations to come--

The Plantation needs to generate money from those who use the wharf and has already annually appropriated 25k in taxpayer funds to build a wharf resiliency fund.

If you are a ferry or another business owner who uses the public wharf for your business, what might be a suitable alternative for fee collection?
