

Monitoring Violations Annual Notice Template

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for Village of Rockdale Public Water Supply IL1970850

Our water system violated several drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During 4/1/2025 to 7/31/2025 we completed our routine IEPA quarterly testing for COMBINED RADIUM (-226 & -228). During this period the samples were collected and sent to our lab for analysis. However, the lab lost our samples and we were not presented with results for the sampling period. We were able to re-submit samples, however they were past our collection date.

What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for COMBINED RADIUM (-226 & -228) how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When samples were or will be taken
COMBINED RADIUM (-226 & -228)	Quarterly	1	7/31/2025	10/30/2025

What happened? What is being done?

A sample was provided to our labs on the 7th month of the quarterly compliance period. Our lab had misplaced out sample and no results were provided within the monitoring period. To prevent this from occurring again, we will follow-up to our lab for timely results.
