## HOME FIRE SAFETY CHECK LIST

A residential fire occurs every half hour in Ohio. How safe is your home from fire? To determine the safety of your home from fire hazards, study these questions with your family. Every "yes" answer indicates a positive fire safety situation. However, every "no" answer points to a fire hazard that needs to be corrected.

Matches/lighters and Careless			Heating and Cooking Hazards		Yes No	
Smoking Hazards	Yes	No	(continued)			
Do you keep matches and lighters away from sources of heat?			If you have a wood burning stove, has it been installed properly according to manufacturers instructions?			
Do you make sure matches and smoking materials are out before disposing of them?			Do you burn seasoned wood and is it stored in the proper place?			
Do you have plenty of large, noncombustible ash trays in every room?			Are all vent connectors and flue pipes that pass through attics, floors, ceilings and walls properly installed?			
Is "No Smoking in Bed" a rule in your home?			Do you clean your chimney at least once a year? (More often if it is used more regularly)			
Do you use ash trays outside to avoid mulch fires?				_	_	
Electrical Hazards			Is your kitchen stove, including the oven and the broiler, kept clean of grease?	Ш	Ц	
Do you have qualified electricians install or extend your wiring?			Do all portable heaters in your home bear the label of Underwriters Laboratories (UL) or some other			
When you buy electrical equipment and appliances, do you always look for the UL label of Underwriters Laboratories Inc.?			recognized safety testing agency?  If you use a portable heater, is it placed well away from any and all combustible materials?			
Are there enough electrical outlets in every room to avoid the need for multiple attachment plugs and long extension cords?			Do you always refill the fuel tank of your kerosene heater outdoors?			
Are there proper heat controls on your electrical iron and all electrical appliances used for cooking?			Since portable kerosene heaters use up oxygen when they burn, do you always have adequate ventilation?			
Do you have adequate circuit breaker fuses for the equipment used in your home?			Do you always turn off the portable heater when you go to bed?			
Are all extension cords of the right size, in the open and not under rugs or through partitions or			Do you make sure that the fuel is not contaminated prior to using it in your kerosene heater?			
openings and are they for temporary use only?  Is there adequate wiring in <u>all</u> rooms for today's elec-			If using kerosene heaters, do you have working carbon monoxide detectors outside of each sleeping area?			
tronics?			Is your inside basement door at the head of the stairs	П	П	
<b>Heating and Cooking Hazards</b>			properly fitted and kept closed at night?			
If you use oil heat or gas heat, is the equipment listed by the proper laboratories such as UL or the American Gas Association?			Has everyone in the family been warned never to use any flammable liquids to start a fire in the stove, fireplace or furnace?			
Before the heating season begins, do you have your heating system inspected and serviced?			Is every fireplace equipped with a sturdy metal fire screen?			

Housekeeping Hazards	Yes	No	<b>Especially for Parents</b>	Yes	No
