

This link (<https://apps.psc.wi.gov/ERF/ERF/ERFhome.aspx>) provides instructions on how to subscribe to a docket so you can get notifications every time a new document is filed in a case. You can do that or check manually for things as well. After a developer files an application, the PSC sets up a project specific page. The information on that page includes an interactive map to see the proposed facilities in relation to the existing landscape and infrastructure.

The Electronic Records Filing (ERF) System provides for the electronic submission of filed documents and online access of these documents including those submitted in formal cases before the Commission. With ERF Commission staff receive, circulate, process and publish thousands of electronically filed documents. ERF reduces the time necessary to make decisions on proposed actions, increases public access to formal case information, and provides an easy, convenient way for utilities, applicants, and other parties to participate in the Commission's formal case process.
