

Oswego Solar Project

Address: 447 Co Rt 20, Oswego, NY 13126

Project Size: 3 megawatt (MW) alternating current (AC) (Enough to power 900 houses.)

Zoning District: A-3

Parcel Size: 78 acres

Limit of Disturbance: 22.4 acres

Point of Interconnection: Existing three-phase distribution line on County Route 20

Interconnection: Paloma substation, which serves the City and Town of Oswego and extends into portions of the towns of Hannibal, Clifty, Minetto, Schira, and Valley

Topography: A nearly level site with very little grading required.

Flood Zones: The project is not located within any FEMA designated flood zones.

Wetlands and Waterbodies: The project avoids all federally and state regulated wetlands.

Agricultural Resources: The site is not located in an Agricultural District and is not used for agricultural purposes.

Threatened and Endangered Species or Habitats: Consultation with the U.S. Fish and Wildlife Service, the New York Department of Environmental Conservation, and New York Natural Heritage Program concluded that there would be no impact to threatened/endangered species or critical habitats.

Archaeological/Cultural Resources: The New York State Office of Parks, Recreation and Historic Preservation Office (SHPO) reviewed the site and concluded that no historic properties, including archaeological and/or historic resources, will be affected by this undertaking.
