

**TOWN OF REDINGTON BEACH, FLORIDA  
PARKS AND RECREATION BOARD  
REGULAR MEETING AGENDA  
May 3, 2021**

The Park Board of the Town of Redington Beach, Florida will meet Monday, May 3, 2021 at 10:00 a.m. in Redington Beach Town Hall, at 105-164<sup>th</sup> Avenue, Redington Beach, Florida

---

**CALL TO ORDER and PLEDGE OF ALLEGIANCE**

**ROLL CALL**

**APPROVAL OF MINUTES** of April 5, 2021

**APPROVAL OF AGENDA** of May 3, 2021

**UNFINISHED BUSINESS**

1. Work Order Status
2. Town Park
  - a. Florida League of Cities Insurance Review
  - b. Pole Lights
  - c. Sensory Dome and Zip Line
  - d. Sail Shade Bench
3. Friendship Park
  - a. Garden Club Project
  - b. Plantings and Groundcover
4. Holiday Lights

**NEW BUSINESS**

**ADJOURNMENT**

**Next meeting:** June 7, 2021

**Town of Redington Beach, Florida**

**Parks and Recreation Board**

**Regular Meeting Minutes**

**April 5, 2021**

**Call To Order**

Chairperson Kris Johanson called the meeting to order at 10:00am

Pledge of Allegiance

**Roll Call**

Kris Johanson

Debi Robinson

Bob Kahn

Mandy Kwon

Tiffany Terracciano,

Also Present Town Clerk Missy Clarke and Mayor Will

**Approval of Minutes: March 1, 2021**

Requested changes: None

Motion to Approve: Debi Robinson. Second: Bob Kahn. Motion carried.

**Approval of Agenda: April 5, 2021**

Motion to Approve: Debi Robinson. Second: Bob Kahn. Motion carried.

## Unfinished Business

1. Work Order Status
  - A. Town Park Public Works continues to monitor and tighten chimes as needed.
  - B. Town Park re-sanding of the 5-12 year-old playground area on hold. Plan to wait until new playground equipment is installed.
  - C. 158<sup>th</sup> Triangle parking had pilings installed week of March 29<sup>th</sup>, 2021 and rope installation in progress.
  - D. Town Park *No Dogs Allowed* signage completed.
  - E. Items to be added: Kris Johanson suggested adding a work order for removal of a broken sign pole that poses a safety hazard in the 164<sup>th</sup> Cul de sac. Temporary measure of a reflector placed until removal.
2. Town Park
  - a. Pole lights

Missy Clarke has not received a response from fabricator. She will attempt to reach another vendor and request quote.
  - b. Sensory Dome and Zip Line

Missy Clarke met with installer for new sensory dome and zipline and was advised that removal of jungle gym, monkey bars, and seesaw would need to occur in order to comply with safe fall zones for new equipment. A safety check was also performed by Florida League of Cities which determined that the swing set was not in compliance due to proximity to other objects and the lack of tamper-proof hardware. In addition, the current sand is not compliant and recommendations to replace the sand with mulch or rubber surface were suggested. Additionally, the landscape fabric was identified as a tripping hazard (artificial turf was suggested), and the pink climber and monkey bars are starting to corrode and have also been identified as safety hazards. Debi Robinson suggested a swing set replacement that would conform to insurance safety guidelines, possibly considering a smaller unit. Missy to contact Game Time for swing set recommendations that would meet safety measures and to request playground design. Engineer to be contacted to determine what faults exist with current equipment, then consider plans for removal and possible replacement. New mulch or rubber surface to be completed after equipment installed. Budget for swing set may be requested in 2022 budget. Budget for rubber mulch to be determined: Park and Recreation Department versus Public works.
3. Friendship Park Gazebo-current quote from vendor requested by Missy Clarke totaled \$68, 000 for a 16ft by 20 ft gazebo with Trex decking. It was determined that gazebo size should actually be 16 ft by 16 ft. Missy Clarke offered to get another quote from gazebo.com. Debi Robinson suggested product with wood insert. Mayor Will agrees with suggestion by Bob Kahn for custom pergola with architect to sign off to meet wind load requirements. A suggestion made for sail shades, but majority vote to table gazebo/pergola in Friendship Park due to cost, obstacles with wind load requirements, and functionality, and discussion moved on to mulch versus shell to cover dirt areas in Friendship Park. Kris Johanson to get copy of Friendship Park drawing to determine placement of shell vs. mulch, and will defer further discussion to meeting next month.
4. Holiday lights-Kris Johanson reached out to Clark- will have report for next meeting.

5. Town Park signage- Missy Clarke left messages for prior vendor, looking to duplicate current signage, unanimous vote to table town park signage.
6. Town Park sail shade bench- Adriana to take care of bench donation by Jen Greacen today.
7. Garden Club project- Toni Scarr President of Garden Club, still looking at plant varieties for 911 Memorial Garden, hoping to have suggestions by meeting next month, still looking at red plants/flowers per artist suggestion, current suggestions are for a rose garden that will survive with low maintenance or red flower.

#### **New Business**

1. Updated Parks and Rec ordinance 2021-2

**Next meeting May 3, 2021**

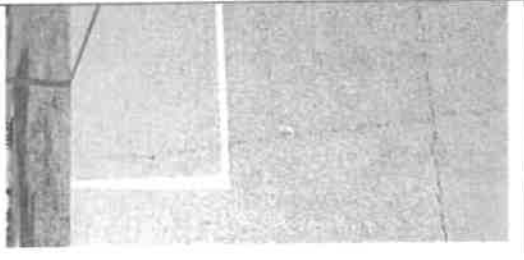

#### **Adjournment**

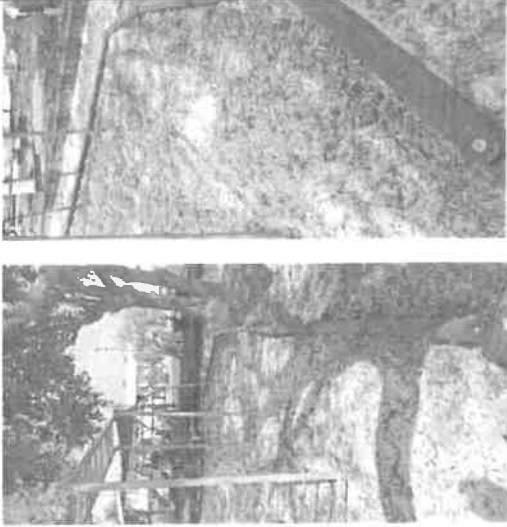

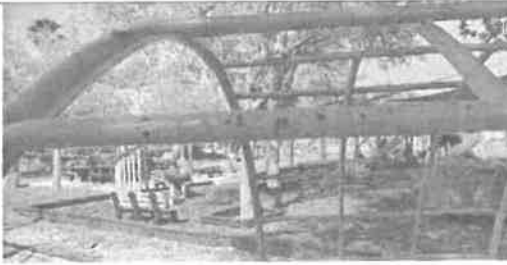

Kris Johanson adjourned the meeting at 10:50.

|    |                                                                                                                                                                                                       |                                                                                      |  |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|--|
| 4. | <b>Public Works-</b> There were no lights in the truck bays.                                                                                                                                          | NA                                                                                   |  |
| 5. | <b>Town Park-</b> There was a missing top cap on the gate which could pose a laceration hazard.                                                                                                       |    |  |
| 6. | <b>Town Park-</b> There was some exposed landscape fabric under the rock climber which could pose a potential tripping hazard.                                                                        |    |  |
| 7. | <b>Town Park-</b> There was some exposed landscape fabric under the slide which could pose a potential tripping hazard.                                                                               |   |  |
| 8. | <b>Town Park-</b> The metal bracket under the lady bug rocker is starting to corrode causing some sharp edges and eventually failure.                                                                 |  |  |
| 9. | <b>Town Park-</b> There were some small cracks in the basketball surface which could worse and pose a trip hazard. To prevent further deterioration it's recommended to patch the surfacing material. |  |  |

|     |                                                                                                                                                                                                                                                                               |                                                                                      |  |
|-----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|--|
| 10. | <p><b>Town Park-</b> There was not enough “use zone” around the old climbers. A minimum of 6 feet of safety surfacing is required around playground equipment.</p>                                                                                                            |    |  |
| 11. | <p><b>Town Park-</b> The pink climber is starting to corrode in several areas. This corrosion can cause sharp edges that may pose a laceration hazard. Its recommended to grind the area to bare metal then sand it smooth before recoating.</p>                              |   |  |
| 12. | <p><b>Town Park-</b> There were several areas around the fence where the chain link needs to be tightened or reattached.</p>                                                                                                                                                  |  |  |
| 13. | <p><b>Town Park-</b> The hardware being used to attach the swings to the chains is not appropriate. This should be replaced with tamperproof hardware.</p> <p>Here are some examples:</p>  |  |  |

14. **Town Park-** The sand under the older equipment is not a suitable safety surface. Sand can only be used if there is a maximum fall height of 4 feet. Since the climbers and the swing all pose fall hazards greater than 4 feet it is recommended to fill the area with another loose fill material including wood chips or shredded rubber.

**Table 2. Minimum compressed loose-fill surfacing depths**

| Inches                                                                                                                                                                                                          | Of | (Loose-Fill Material)    | Protects to | Fall Height (feet) |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|--------------------------|-------------|--------------------|
| 6*                                                                                                                                                                                                              |    | Shredded/recycled rubber |             | 10                 |
| 9                                                                                                                                                                                                               |    | Sand                     |             | 4                  |
| 9                                                                                                                                                                                                               |    | Pea Gravel               |             | 5                  |
| 9                                                                                                                                                                                                               |    | Wood mulch (non-CCA)     |             | 7                  |
| 9                                                                                                                                                                                                               |    | Wood chips               |             | 10                 |
| * Shredded/recycled rubber loose-fill surfacing does not compress in the same manner as other loose-fill materials. However, care should be taken to maintain a constant depth as displacement may still occur. |    |                          |             |                    |

15. **Town Park-** The new shade structure is encroaching on the swings use zone. Either the structure needs to be moved or the swing needs to be moved.
- See below for details:

**Use zone for single-axis swings – belt and full bucket**

The use zone in front of and behind the swing should be greater than to the sides of such a swing since children may deliberately attempt to exit from a single-axis swing while it is in motion. See Figure 25 (Below).

- The use zone for a belt swing should extend to the front and rear of a single-axis swing a minimum distance of twice the vertical distance from the pivot point and the top of the protective surface beneath it.
- The use zone for a full bucket swing should extend to the front and rear a minimum of twice the vertical distance from the top of the occupant's sitting surface to the pivot point.
- The use zone in front of and behind swings should never overlap with any other use zone.
- The use zone to the sides of a single-axis swing should extend a minimum of 6 feet from the perimeter of the swing. This 6-foot zone may overlap that of an adjacent swing structure or other playground equipment structure
