

**TOWN OF SAINT JOSEPH
2021 PERCH LAKE ROAD IMPROVEMENTS PROJECT
RESIDENT NOTIFICATION**

As you may be aware, the Town of St. Joseph is planning to rehabilitate and widen Perch Lake Road from 53rd Street to 60th Street in the spring/summer of 2021. In general, the project consists of the following:

- Pulverize the existing pavement and base
- Widen the roadway to a total width of 24' of pavement
- Construct 2' wide gravel shoulders
- Regrade ditches
- Replace select culverts

Due to the pandemic, we will not be holding a neighborhood meeting. However, as we begin to finalize the design, we would like to hear any feedback or questions you may have about the project. In addition, your contact information would be greatly appreciated so that we are able to contact you to discuss potential impacts to your property (if necessary).

Additional information regarding the project will be uploaded to the Town's website (www.townofstjoseph.com) by December 10, 2020 for your review.

Please contact Kellie Schlegel or Lee Mann (Town Engineer) at the information below if you have any questions or concerns regarding this project, or to provide your contact information. Please note that additional information will be sent out next spring with more details regarding the construction process, resident access, mail delivery, etc.

You can also contact the Town Chair, Theresa Johnson, at 715-222-6235, or any of the Town Supervisors with your questions or comments.
