

## **Visual Preference Survey**

**A Community Planning Exercise**  
**Thursday October 18 at 6:30 pm**  
**Reiter Center**

All residents, business and property owners in Three Lakes are highly encouraged to participate in a Visual Preference Survey (VPS) being conducted by the Economic Development Committee of the Three Lakes Plan Commission. The VPS is one element of a Streetscape Plan being developed by the Eco-Dev committee.

As with every step of the 20-year comprehensive plan, the VPS is driven by the public participation plan that was adopted as part of our local plan commission ordinance. It requires that the community be brought together to provide feedback and come up with ideas - in this case design elements for Downtown Three Lakes. At this fun event, the Eco-Dev committee will be carefully taking input as to what our citizens, friend and neighbors would like to see be maintained or altered for our Downtown - or to even create something entirely new.

The VPS exercise will start off with a brief overview of the reasons we have undertaken this project, what we hope to accomplish at the exercise, and the projected end results. It is based on **your** input that the Committee members will proceed with recommendations for the future. So please plan to join us - and bring a neighbor along!
