

# Bristolboard

**Tree Order Deadline is February 28, 2014**

Attached in this newsletter are the tree order forms and their descriptions from Kenosha and Racine County. The two best times to plant trees are 20 years ago and today.

Trees can add value to your home, help cool your home and neighborhood, break the cold winds to lower your heating costs, and provide food for wildlife.

This drawing demonstrates effective planting, placing the right tree in the right place. Trees properly placed can lower line clearance costs for utility companies, reduce tree mortality, and result in healthier community forests.

**Please call Diggers Hotline before you dig (1-800-242-8511).**

If you are planting near wires choose trees or shrubs that will not grow within 10 ft of any wire. Ask yourself: "If I plant this at this location, what will be affected?" Road Right of Ways are usually 66 ft. which would locate your property line at approximately 33 ft. from the center line of the road. If you would like to plant near the right-of-way, please call the Village Hall for more information.

**DEADLINE FOR ORDERING: FEBRUARY 28, 2014**

ALL PRICES INCLUDE SALES TAX. SINGLE ORDERS OF 500 TREES OR MORE RECEIVE A 10% DISCOUNT

ORDER FORMS ARE ALSO ON THE WEB AT [www.kenoshacounty.org/index.aspx?nid=713](http://www.kenoshacounty.org/index.aspx?nid=713)

MAKE CHECK or MONEY ORDER PAYABLE to: **KENOSHA COUNTY PLANNING AND DEVELOPMENT**

ALL STOCK IS PERISHABLE, AND MUST BE PICKED-UP ON DELIVERY DAY, MID-APRIL (NOTICE WILL BE MAILED TO YOU)

ORDER EARLY - LIMITED SUPPLY - CHECKS WILL BE RETURNED IF YOUR ORDER CANNOT BE FILLED

FULL PAYMENT MUST BE INCLUDED WITH THE ORDER. NO REFUND/WARRANTY ON ALL PRODUCTS.

COMMON NAME	DESCRIPTION AND CHARACTERISTICS
<b>BLACK CHERRY</b> GROWTH RATE - FAST	The Black Cherry may grow to 60-80 feet tall by 30 feet wide (or larger) when it is found in an open field and live as long as 150 years. The fruit is a reddish-black cherry, which is edible although quite acidic. This species is found on a wide variety of soils. The black cherry is one of the largest cherries and, as such, its wood can be very valuable.
<b>BLACK HILLS SPRUCE</b> GROWTH RATE - SLOW	Black Hills Spruce can reach a height of six feet within nine years and is very long-lived. That slow growth results in dense growth, making it perfect for privacy screens and windbreaks. It prefers rich, moist soil and full sun but will also thrive in dry, well-drained locations. You won't have to fuss over it to enjoy a pleasing shape as it requires little or no pruning. Black Hills Spruce is virtually immune to the most common spruce pests and deer generally will even leave it alone.
<b>COMMON LILAC</b> GROWTH RATE - MEDIUM	The Common lilac is noted for its showy, fragrant bloom in the late spring. Flowers come in many colors ranging from white, pink, blue, lavender to reddish-purple. Grows best in well drained, fertile soils, under full sunlight. Average height is 15'.
<b>EASTERN ARBORVITAE</b> GROWTH RATE - MEDIUM	a.k.a. American arborvitae Bright emerald green year-round foliage. Its dense foliage makes an excellent hedge or privacy screen. They will grow to a mature height of 30 to 40 feet and a mature spread of 10 to 15 feet. They prefer full sun to partial shade, and can grow in a variety of soil conditions. The Eastern Arborvitae is tolerant of heat, cold, and wet sites.
<b>EASTERN RED BUD</b> GROWTH RATE - FAST	Spectacular rosy pink blossoms that appear in April, usually one of the first trees to welcome the spring. Great colorful foliage year round with reddish-brown leaves changing to dark green then to yellow in fall. Forms a spreading, graceful crown. Full sun or light shade. Grows to 20' to 30' in height with a 25' mature spread.
<b>FORSYTHIA</b> GROWTH RATE - FAST	a.k.a. Lynwood. Gold Sunny splashes of bright yellow flowers are forsythia's calling card, announcing the return of spring. The blooms are slightly bell-shape and range from butter yellow to gold. Forsythia is excellent for hedging, fast growing and tolerant of moist soils. Grows 6 to 8 feet tall and wide and does best in sun to light shade. Fall color is purple.
<b>FRASER FIR</b> GROWTH RATE - MEDIUM	Often referred to as the Cadillac of Christmas trees. Its fragrance, shape, strong limbs, and ability to retain its soft needles for a long time when cut (which do not prick easily when hanging ornaments) make it one of the best trees for this purpose. Full to partial sun. Likes cool, moist, well-drained soils.
<b>HAZEL NUT</b> GROWTH RATE - FAST	A large fast growing shrub with showy spring flowers. The Hazel Nut can grow to 8-12' tall with a crown spread of 10', creating a dense privacy screen, perfect for a hedgerow and as nesting sites for birds. The nuts of this American Hazel Nut have a higher nutritional value than acorns and beechnuts, making them a valuable food source for wildlife eaten by turkey, ruffed grouse, and pheasants.
<b>HIGHBUSH CRANBERRY</b> GROWTH RATE - FAST	a.k.a. American Cranberry - grows to 15' and rounded in shape. They make a great hedge or privacy screen. Flowers are very small, white, similar to other ornamental Viburnums. Yellow to red-purple fall color. The fruit is showy red and very persistent, remaining on the bushes well after frost and brightening the winter landscape. Use fruits in jelly, preserves or sauces. This shrub has very few insect problems and prefers good, well-drained soil.
<b>HYBRID POPLAR</b> GROWTH RATE - EXTREMELY FAST	Grown from rooted cuttings this extremely fast grower is widely used in the fuel, pulp and fiber industry also makes an excellent windbreak. Hybrid Poplars can provide privacy and windscreens in 3 years, living borders and shade in 4 years and firewood in 5 years. Hybrid poplar trees grow up to 10 feet per year and they live 40+ years.
<b>NORTHERN BAYBERRY</b> GROWTH RATE - SLOW	The Northern Bayberry is generally described as a Perennial Tree or Shrub. The Bayberry has green foliage and yellow flowers, with blue fruits. The typical Northern Bayberry can reach up to 12 feet high. It has high tolerance to drought conditions. The highly scented fruit of bayberry was a source of wax for early settlers in America. This scent is still used in candle making.
<b>NORTHERN RED OAK</b> GROWTH RATE - FAST	It is fast growing, easy to transplant, tolerant to a variety of soil conditions. Height: 50 to 75 feet. Spread: 50 to 75 feet. The abundant acorns attract wildlife, and the leaves develop a brick-red fall color. A variety of birds depend upon Red Oak acorns, the wild turkey in particular.
<b>NORWAY SPRUCE</b> GROWTH RATE - FAST	The Norway Spruce is the most widespread, fastest growing, largest and most disease resistant spruce in the northern hemisphere. This is not a tree for a small yard! The Norway Spruce can grow 2-3+ feet per year their first 25 years under good conditions. The Norway spruce has a fibrous deep spreading root system that makes this tree very wind stable, able withstand winds up to 100MPH.
<b>RED MAPLE</b> GROWTH RATE - FAST	Brilliant fall coloring is one of the outstanding features of the Red Maple. This tree prefers full sun to partial shade and tolerates both extremely wet to extremely dry soils. The Red maple is prized as an ornamental shade tree because of its rapid growth, reaching heights of 40-70' tall. Leaves have a silvery underside and turn a pale yellow in the fall.
<b>RED OSIER DOGWOOD</b> GROWTH RATE - FAST	This is an attractive plant year round. In the winter it is known for its flaming red bark and in the spring and summer for its light foliage that flickers in the wind. Fall foliage is golden to reddish on red stems. The small flowers are in large clusters of frothy white. The berries are pale with a touch of blue. Grows best in moist to wet soils with full sunlight. Average height is 8' and it spreads outward to 6'.
<b>RUGOSA ROSE</b> GROWTH RATE - FAST	The Rugosa Rose is a shrub mainly used as a hedge that has beautiful pink flowers that continually bloom from June through August and are 2 1/2 to 3 1/2 inches in size. It develops 1 inch red berries in August which last through the winter to provide food for wildlife. Grows to a height of 6' high and 6' wide.
<b>SARGENT CRABAPPLE</b> GROWTH RATE - MEDIUM	'Roselow' Sargent's Crabapple is a small dense-branching crabapple that is covered with pure white fragrant blossoms in mid-May. One of the smallest crabapples, it reaches a height of only 8 feet. Full sun is ideal. Resistant to drought, soil compaction and flooding. This tree does well on a variety of soils and is an excellent planting for wildlife or windbreak.
<b>SHADBLOW</b> <b>SERVICEBERRY</b> GROWTH RATE - FAST	One of the first trees to bloom in early spring, these trees are covered with billowy masses of small white flowers. Berry-like fruits are produced in summer and are edible if the birds don't get them first. Serviceberry got its name from the custom in days gone by of cutting the branches in winter and forcing them into bloom for Sunday church services. Height: 25-30 feet. Sun to partial shade.
<b>SUGAR MAPLE</b> GROWTH RATE - MEDIUM	The Sugar Maple is a landscape standout. Medium to dark-green leaves turn yellow, burnt orange or red in fall. Tolerates shade, likes a well-drained, moderately moist, fertile soil. Do not plant in confined areas or where salt is a problem. Grows to 60' to 75', 40'-50' spread. The sugar maple tree is the principal source of maple sugar.
<b>TULIP TREE</b> GROWTH RATE - FAST	A fast-growing tree with bright green leaves that resemble tulip flowers in profile and turn golden yellow in fall. Greenish-yellow flowers are carried high in the tree. Stems are aromatic. Oval in shape, grows well in various soils, likes full sun. Grows to 70' to 90', 40' spread.
<b>WHITE PINE</b> GROWTH RATE - FAST	The White Pine is a large, straight-stemmed tree with a pyramidal crown. Clustered soft blue-green needles. Ideal screen or windbreak. Likes moist, well-drained soils. Grows 50' to 80' with a 20-40' spread. Mature trees can easily be 200 to 250 years old.
<b>WHITESPIRE BIRCH</b> GROWTH RATE - FAST	Whitespire Birch has a nice narrow, pyramidal size and has chalky white bark that looks great all season long, because of its shape it's great along property lines. The bright green leaves rustle in the wind and turn the brightest yellow in the fall. It is heat tolerance and disease resistance. Grows well in full sun, reaching 50-60 feet when mature. It does well under a wide range of soil types.

## 2014 Racine County Land Conservation Tree Program - Order Form

### Deadline for Ordering - February 28, 2014

Seedling Trees or Shrubs	Age	Size	# of Bundles *	X (\$/Bundle)	Total Amount

**MAKE CHECKS PAYABLE TO: RACINE COUNTY (Enclose full amount.)**

\* Each Bundle contains approximately 25 seedlings.

You **DO NOT** need to be a Racine County resident to participate.

\* Pick up date is **MID-APRIL** at the Racine County Fairgrounds, Union Grove - **Notice will be sent via mail** 

**SUPPLY IS LIMITED**, please order early! Orders will be reserved as received.

Orders that are unable to be filled will be contacted for alternative plants or returned to customer.

**NO REFUNDS** or **WARRANTY** on all living plants or seed. *Plants are perishable and MUST BE picked up on the delivery day.*

**Questions: Call Chad Sampson, M-F 8:00-4:30, 262-886-8440**

**MAIL TO:** Racine County Land Conservation Division  
14200 Washington Ave.  
Sturtevant, WI 53177

**Checklist:** ① Check math  
② Fill in total ③ Print name and address clearly  
④ Enclose a check for the full amount

## Tree, Shrub, and Seed Descriptions

Tree, Shrub, and Seed Descriptions							
Common Name	Scientific Name	Growth Rate	Height	Soils	Sun Exposure	Shape Spread	Other Features
Evergreen Seedlings							
White Pine	<i>pinus strobus</i>	Fast	50 - 80'	Most - Well drained	Full	Pyramidal 20 - 40'	Long needles • Clusters of 5 • Windbreak
Scotch Pine	<i>pinus sylvestris</i>	Medium	50 - 60'	Most - Well drained	Full / Partial	Conical 25 - 40'	1" - 3" Needles • Hardy • Windbreak
Red Pine	<i>pinus resinosa</i>	Medium	70 - 80'	Most - Well drained	Full / Partial	Conical 20 - 40'	Long needles • Attracts wildlife • Windbreak
White Spruce	<i>picea glauca</i>	Medium	40 - 60'	Most - Drought tolerant	Full	Columnar 10 - 20'	Blue-green needles • Attracts wildlife • Windbreak
Colorado Spruce	<i>picea pungens</i>	Slow - Med	50 - 75'	Most - Drought tolerant	Full	Pyramidal 10 - 20'	Short, green to silver-blue needles • Windbreak
Norway Spruce	<i>picea abies</i>	Med - Fast	40 - 60'	Most - Drought tolerant	Full	Pyramidal 10 - 20'	Fast Growing • Attracts wildlife • Windbreak
White Cedar	<i>thuja occidentalis</i>	Slow - Med	40 - 60'	Most - Wet	Full	Pyramidal 10 - 15'	Plant 3' apart for hedge • Flat leaves • Windbreak
Shrub Seedlings							
Elderberry	<i>sambucus canadensis</i>	Fast	5 - 12'	Most	Full	Round 5 - 12'	White flowers in late spring • Purple-black fruit in late summer
Butterfly Bush	<i>buddleia davidii</i>	Fast	6 - 12'	Most	Full	Shrub 10 - 15'	Attracts butterflies • Multi-colored blooms • Can be cut back
Serviceberry	<i>amelanchier alnifolia</i>	Fast	10 - 20'	Most	Full	Shrub 6 - 20'	Ornamental • Tall shrub • Attracts wildlife
Highbush Cranberry	<i>viburnum opulus</i>	Fast	6 - 12'	Most - Well drained	Full / Partial	Shrub 6 - 12'	White flowers • Red berries
Deciduous Seedlings							
Red Maple	<i>acer rubrum</i>	Med - Fast	40 - 60'	Most	Full / Partial	Oval 25 - 40'	Red flowers in spring • Red/Yellow fall leaves
Swamp White Oak	<i>quercus bicolor</i>	Medium	50 - 60'	Most	Full/Partial	Round 50 - 60'	Likes moist/wet soils • Drought resistant • Yellow - Purple fall color
Black Cherry	<i>prunus serotina</i>	Fast	60 - 90'	Most - Drought tolerant	Full/Partial	Oval 35 - 50'	White flowers in May • Purplish-red fruit • Yellow to orange fall color
Red Oak	<i>quercus rubra</i>	Fast	60 - 75'	Most - Drought tolerant	Full	Oval 40 - 45'	Red fall leaves • Acorns • Attracts wildlife • Long living
Hazelnut	<i>corylus americana</i>	Fast	15 - 18'	Most	Full	Round 10 - 12'	Edible nuts (filberts)
River Birch	<i>betula nigra</i>	Med - Fast	40 - 70'	Most - Drought tolerant	Full / Partial	Oval 40 - 60'	Cinnamon colored bark • Attracts songbirds
Pin Oak	<i>quercus palustris</i>	Fast	60 - 70'	Most - Wet	Full	Pyramidal 25 - 40'	Bronze, russet or red fall leaves • Acorns • Attracts wildlife • Long living
Hybrid Poplar	<i>populus deltoides / nigra</i>	Fast	40 - 50'	Most - Wet	Full	Oval 20 - 30'	Very fast growing • Windbreak
Sugar Maple	<i>acre saccharum</i>	Slow - Med	60 - 75'	Most - Well drained	Full / Partial	Oval 40 - 50'	Yellow/orange fall leaves • Attracts wildlife • Shade tree
American Sycamore	<i>platanus occidentalis</i>	Med - Fast	75 - 100'	Moist to Wet - Well drained	Full	Pyramidal 75 - 100'	Bark attains mottled in appearance with age • Yellow/brown fall color
Definitions:							
Growth Rate: The rate of vertical increase in growth. Slow = less than 12" per year, Medium = 13" to 24" per year, Fast = greater than 25" per year Age: All trees are 1 to 3 year old seedlings (No transplants)							
Native Prairie Seed Mix	Prairie Seed  Meets the requirements for the Federal Conservation Reserve Program • Suitable for all soils.  Includes: Big Bluestem, Indian Grass, Little Bluestem, Switchgrass, Canada Wild Rye, Black-eyed Susan, Purple Prairie Clover, and Yellow Coneflower						
Wildflower Seed Mix	This mix consists of 24 species of wildflowers • Works best on clay loam to loam soils that are seasonably moist through well-drained  Includes: Bergamot, Black-eyed Susan, Blue Vervain, Canadian Milkvetch, Cup Plant, Partridge Pea, Golden Alexander, New England Aster Ox-eye, Evening Primrose, Prairie Blazing Star, Purple Coneflower, Rattlesnake Master, Red Milkweed, Round-headed Bush Clover, Sawtooth Sunflower, Showy Sunflower, Smooth Blue Aster, Spiderwort, Stiff Goldenrod, Sweet Black-eyed Susan, White Wild Indigo, and Yellow Coneflower						
Water Gel	Other Items  Designed to increase moisture retention in plants • Mix with water, and gel retains moisture around roots at planting time • The gel will continue to attract and retain moisture for months • Each bag of water gel treats approximately 400 seedlings • DO NOT use in wet soils						
Fertilizer	Gives nutrients in the biodegradable "tea bag" which is dropped in the planting hole and covered with 1 inch of soil  Every 10-gram packet contains 10 essential nutrients and releases them over a 12-month period, when the seedlings need them most.

Trick or Treating  
Thursday, October 31st  
4:00pm to 7:00pm

## **Plan your trick or treat route**

Map out a trick or treating track choosing residential areas that are safe and well lit. Keep to pavements and find the safest places to cross the road.

### **Set off early for trick or treating**

Trick or treating is from 4pm-7pm

### **Be safe and seen in the dark**

Add reflective accessories to bikes and outfits to help children stand out after dark.

### **Cycling at night? Use lights**

If children are cycling at night the law says that bikes must be fitted with clean, working lights - white at the front and red at the back - and a rear reflector.

### **Take a flashlight**

Stick the flashlight in a lantern or inside a pumpkin head for maximum creepiness combined with visibility.

### **Children need an adult with them**

Kids, take a "mummy" or any responsible grown up and make them dress up to add to the fun!

### **Stick together**

Make sure all children know not to go off on a solo mission. Let them know they must always stay with friends and accompanying adult.

### **Don't forget road safety - stop, look and listen**

As simple as this sounds, it can be easy to forget - especially when munching through a bag of Halloween treats. Adults and children need to remember never to cross the road while texting or using a mobile phone.

## Ordinance Concerns

The Village Board is looking into revising the Fowl Ordinance 7-1-10 (b)(4).

This would allow chickens in residentially zoned areas.

If you have any comments please direct them to the Village Administrator at [Bristoladmin@wi.rr.com](mailto:Bristoladmin@wi.rr.com) or call the Village office at 857-2368.

---

## *Need a Building Permit?*

Any structural work needs a building permit. Please call the Village Office if you're not sure if you need a permit. For your convenience, the Building and Zoning permits are on our website.

\*\*\*Work done without a permit will result in tripling the fees.\*\*\*

---

## Public Works Department

Public Works would like to remind residents of the following:

- When snow blowing or shoveling your driveway, try to move the snow to the right of your driveway as you are looking at the street. If you put it on the left, side the snow plow may carry it back into the front of your driveway. This will not eliminate the snow but should reduce the amount that ends up at the end of your driveway. It also violates town ordinance to plow or blow snow into the road. Any snow put into the road may cause the resident or business to be ticketed.
- Snow and ice control of sidewalks and driveways is required of the property owner.
- Piling of snow in front of fire hydrants or sprinkler connections is illegal.

With winter coming soon, snow issues become more prevalent. Please help out by keeping fire hydrants clear of snow if they are near your residence or business.

---

## Daylights Savings—"Fall Back"

Daylight saving time will end at 2 a.m. on Nov. 3, allowing you to gain back that hour of sleep (for at least one night). Most people will turn their clocks back before going to bed Saturday.

Doctors recommend that you modify your schedule early - at least a week before the time change. Other tips include keeping well hydrated, staying active during the day and adjusting your medication schedule. Doing all of these things a few days before the time change helps your body to adjust.
