Who's Ready for Spring!

Spring..... Into Safety

Each of the four seasons brings a new set of hazards. The arrival of spring means warmer temperatures and more people venturing outside, which leads to a long list of outdoor hazards.

There are safety hazards everywhere and in almost any situation. Familiarize yourself and your family with common hazards to better enjoy the season.

- **Cleaning**

With spring cleaning just around the corner mark **May 3rd** on your calendar. It is the **hazardous material drop off day** sponsored by Waste Management.

Here are the details.

Saturday, May 3rd from 8:00am -1:00pm
Kenosha County Center-Public Works Garage
19600 75th St—Bristol WI 53104

*For a detailed list of acceptable items to bring go to:
<http://kenosha.uwex.edu/>*

- **Allergies**

Allergies are a big part of spring for many people. Get advice from your doctor on which allergy medication to keep handy and have it ready for anyone in the family that needs it.

- **Lawn Maintenance**

Pick up stones, sticks and other possible flying debris before mowing and always wear shoes! Never leave a running mower unattended, and constantly keep an eye out for people and pets.

If necessary, use gloves and eye protection.

Drink plenty of water to stay hydrated when working outside in hot temperatures.

Do not use tools with broken or worn parts or wiring. A short trip to the hardware store beats hours in the ER. When your chores are complete store them unplugged in a safe place.

WisDOT Public Meeting is **April 7, 2014**

This meeting is about the Hwy 45 construction project.

The Wisconsin Department of Transportation (WisDOT), and their design consultant R.A. Smith National, have scheduled a Local Officials' Meeting to discuss the proposed improvements of US 45 from the Illinois State Line to WIS 50 in Kenosha County. The next Public Involvement Meeting that is tentatively scheduled for **April 7, 2014 from 6:00 to 8:00 pm** at the Village Hall. US 45 is proposed to be resurfaced from the Illinois State Line to 86th Street.

Intersection improvements will also be made to improve or add turn lanes and to provide bike accommodations. US 45 is proposed to be reconstructed with an urban cross section from approximately 86th Street to just south of WIS 50. The purpose of the project is to improve pavement condition, safety and operations, as well as preserve mobility on US 45.

If you have any questions at this time, or if you cannot attend the meeting, but would like to find out more about the proposed improvements, please contact me or the WisDOT Project Manager, Brian Pluemer at (262) 945-2131 or brian.pluemer@dot.wi.gov.

Anyone interested in advertising their business on the outfield fence this year can contact the Village Office for more information. The park attracts a lot of attention with ball games and Progress Days and could boost your business.

Softball / T- Ball registration is **April 3rd from 6:00-8:00 pm** at the Village Hall.

All games are played at Hansen Park.

Come to the registration and talk to the coaches if you're interested in helping out this year.

Forms are also available on our website—villageofbristol.org.

April 1st is Election Day—Your Vote Counts!

LOCATION AND HOURS OF POLLING PLACE

At the Spring General Election to be held on **April 1, 2014** in the **Village of Bristol**, the following polling place locations will be used for Wards 1-8. Please contact our office if you are uncertain where you go to cast your vote.

Location

**Wards 1,2,3 & 8 Bristol Village Hall
19801 83rd Street**

**Wards 4, 5, 6 & 7 Holy Cross Church
18700 116th Street**

THE POLLS WILL OPEN AT 7:00AM AND CLOSE AT 8:00PM

All polling places are accessible to the elderly and disabled voters.

“ Be kind to your neighbors when burning. ”

It ' s that time of year again.....get your burn permit

Remember to get a burn permit if you have not done so. The renewal fee is \$15 and permits can only be issued at the Village Office or the Fire Department.

Remember to call the “ Burn ” line at 857-4063 to find out if burning is permitted for each day. You must also remember to follow the guidelines that are on the permit as conditions can change during the day. If you have questions about burning, please call the Fire Department at 857-2711 and they will assist you .

We need to be able to find your residence or business, so please make sure you have your Address numbers (3 inches high) on your house if within 100 feet of the street or on a post or mailbox at the road. Ordinances and Postal regulations require this to be done as well as help find you in an emergency.

Homeowner Guide to Emerald Ash Borer Insecticide Treatments

R. Chris Williamson and PJ Liesch, UW Entomology

Emerald ash borer insecticide treatment considerations. Several insecticide products are available to homeowners for control of emerald ash borer (EAB). Based on current research however, treatments are suggested only for ash trees located within 15 miles of a confirmed EAB site, or for trees located within a quarantined area. Insecticide treatments are **not** necessary for ash trees located outside of these areas. Even within the 15-mile radius, not all trees should be treated. Due to the expense of yearly insecticide treatments, one should consider the value of a particular ash tree in relation to insecticide treatment costs before making any treatments. In addition, consider the health of each tree before treating. Research suggests that insecticide treatments are significantly more effective on EAB-infested ash trees with less than 50% canopy dieback. Insecticide treatments are **not** suggested for trees with greater than 50% canopy dieback. Trees with greater than 50% canopy dieback should be removed and destroyed in accordance with established guidelines.

Emerald ash borer insecticide treatment options. Insecticide products available for use by homeowners are summarized in Table 1. They include:

- ACECAP 97 Systemic Insecticide Tree Implants (acephate)
- Bayer Advanced Tree and Shrub Insect Control (imidacloprid)
- Bayer Advanced Tree and Shrub Protect & Feed (imidacloprid)
- Bayer Advanced Tree and Shrub Protect & Feed II (imidacloprid + clothianidin)
- Bonide Annual Tree and Shrub Insect Control (imidacloprid)
- Ferti-lome Tree and Shrub Systemic Drench (imidacloprid)
- Green Light Tree and Shrub Systemic Insect Killer w/Safari 2G (dinotefuran)
- Green Light Emerald Ash Borer Killer (dinotefuran)
- Optrol (imidacloprid)
- Ortho Max Tree and Shrub Insect Control (imidacloprid)
- Ortho Bug-B-Gone Year Long Tree and Shrub Insect Control (imidacloprid)

The Bayer Advanced Products, Bonide Annual Tree and Shrub Insect Control, Ferti-lome Tree and Shrub Systemic Drench, Optrol, Ortho Max Tree and Shrub Insect Control, and Ortho Bug-B-Gone Year Long Tree and Shrub Insect Control are systemic insecticides applied as soil drenches around the base of an ash tree in mid-April to late-May and/or early-September to mid-October. Two of the Bayer Advanced Products (Tree and Shrub Protect and Feed, Tree and Shrub Protect and Feed II) and the Green Light products (Tree and Shrub Systemic Insect Killer and Emerald Ash Borer Killer) are available in granular formulations. Be aware that many insecticide products available at hardware stores and garden centers look alike. Carefully check all product labels before purchase to make sure that you've selected the correct product/active ingredient. ALWAYS read and follow the respective pesticide label directions! University research indicates that soil applications of imidacloprid provide excellent EAB protection for small ash trees less than about 18 inches in circumference in the first year following treatment. Current research findings also suggest that EAB-infested ash trees greater than about 50 inches in circumference (16 inch DBH) should be treated in the fall and again the following spring. Additionally, larger trees may require two years of treatment before they are effectively protected. Thus, treatment of large tree should begin before the tree becomes infested. Lastly, insecticide treatments must be repeated each year.

Although ACECAP 97 Systemic Insecticide Tree Implants are available to homeowners, they are not suggested for use by homeowners because they require physically drilling into a tree during their application.

Table 1 <i>Emerald ash borer insecticide treatments available to homeowners</i>			
Product	Active Ingredient	Timing	Type of application
Bayer Advanced Tree & Shrub Insect Control (D)	Imidacloprid	Mid-April to mid-May and/or early-Sept. to mid-Oct.	Soil Drench (D) or Granular (G)
Bayer Advanced Tree & Shrub Protect & Feed (D or G)			
Bonide Annual Tree & Shrub Insect Control (D)			
Ferti-lome Tree & Shrub Systemic Drench (D)			
Optrol (D)			
Ortho Max Tree and Shrub Insect Control (D)			
Ortho Bug-B-Gone Year Long Tree & Shrub Insect Control (D)			
Bayer Advanced Garden Tree & Shrub Protect & Feed II (D or G)	Imidacloprid + Clothianidin	Mid-April to mid-May and/or early-Sept. to mid-Oct.	Soil Drench (D) or Granular (G)
Green Light Tree & Shrub Insect Control w/ Safari 2G	Dinotefuran	Mid-May to mid-June	Granular
Green Light Emerald Ash Borer Killer			
ACECAP 97 Systemic Insecticide Tree Implants	Acephate	Mid-May to mid-June	Trunk Implant

Other emerald ash borer treatment options. Homeowners may also contact a certified arborist or certified pesticide applicator to treat their trees. See www.waa-isa.org for a list of certified arborists in Wisconsin. Professionals have access to some products that are not available to homeowners.

The University of Wisconsin does not endorse commercially available insecticide products over those available directly to homeowners. Products discussed in this fact sheet have been evaluated in a variety of Michigan State University research tests on EAB.

For more information on controlling emerald ash borer: See www.entomology.wisc.edu/emeraldashborer, www.emeraldashborer.wi.gov or www.emeraldashborer.info or contact your county Extension agent.

For a video demonstration of treating your ash trees using a systemic drench, visit: www.entomology.wisc.edu/emeraldashborer
