# Mosquito Control

The Village of Bristol has once again started spraying for mosquitoes for the 2018 season. Our Public Works truck will be driving slow and spraying a natural pesticide to control mosquitoes. This is done shortly before dusk, traveling less than 15 mph.

- It cannot be raining and the air temp must be above 65 degrees for best results.
  - Winds must be less than 10 mph.
- The pesticide only works when the mosquitoes are in flight.
  - Spraying will be done on a weekly basis over a two night period.

Residents are asked to please remove any standing water in your yards. The standing water serves as a perfect breeding ground for the mosquitoes to lay their eggs and spawn a new batch of mosquitoes.

**\*\*\*The pesticide is only dangerous to the mosquitoes- not humans or animals.\*\*\***
