

# Important Information about your Drinking Water

## Levels of Benzene in La Valle water exceed standard

The samples listed below indicate the presence of Benzene in excess of the 5 ug/L Maximum Contaminant Level (MCL) in your drinking water and are a violation of State and Federal Safe Drinking Water Regulations.

A water sample collected on November 18, 2020 indicated the presence of Benzene above the MCL at 82.4 ug/L

### What precautions should be taken at this time?

You do not need to use an alternative (e.g., bottled) water supply. However, if you have specific health concerns, consult your doctor.

### What does this mean?

This is not an immediate risk. If it had been, you would have been notified immediately. Some people who drink water containing benzene in excess of the MCL over many years could experience anemia or a decrease in blood platelets and may have an increased risk of getting cancer.

### What is being done to correct the problem?

Sample testing up to date, time line and installation dates for filter system being finalized with DNR approval, continue working with MSA, DNR and DHS to resolve

Corrective action(s) taken: \_\_\_\_\_

We are working to resolve this problem as soon as possible. We will notify you when the problem is resolved.

### If you have questions regarding the safety of our drinking water, please contact:
