

Yard Waste
Jun 24, 2014

The Department of Public Works is requesting that you please properly manage and dispose of yard wastes (grass clippings, leaves, etc.) and don't put them in the street, gutter or a storm drain. By doing so, backups of storm drains and the storm water system may occur.

All storm drains lead to Duck Creek and Wyona Lake. Please do your part by blowing your grass clipping away from the street or bagging / composting your yard waste.

Contact the Public Works Department for more information on leaf and brush pickup programs offered by the Village at 608-429-2349.
